

Do you  
and your partner  
**TALK about SEX?**

★ Having sex affects both of you.

★ Talking with your partner can help you:

- Protect your health
- Avoid pregnancy

**It Takes Two!**

# Sex and Birth Control... It Takes Two!

Talk with your partner  
about sex and birth control.

## ★ Questions to ask each other:

- Do we both want sex?
- Do we want a child now?
- Which birth control method is right for us?
- Will we have sex only with each other?
- How will we protect ourselves from HIV/AIDS and other diseases you can get from having sex?

## ★ For guys:

- Learn about **birth control** and use it correctly.
- **Support your partner.** Go to the clinic with her, or just ask what you can do.
- **Protect yourself** and your partner from diseases people get from having sex.
- Get tested and **use condoms.**
